Discrete Structures I & II, Data Structures, Database Systems, Computer Algorithms, Theory of Computation, Data Mining, Graphic Design & Digital Tools

Database Systems Final Project

- Created a database in MySQL that stored information about customers shopping on an online bookstore
- Information included customer account details, payment method, book details, shopping cart, billing

AWARDS AND HONORS

Jogues Scholarship

TECHNICAL EXPERIENCE

Data Art Research, Research assistant

October 2019 – Present

- Currently assisting research under Dr. Vacca as part of the Human-Computer Interaction group at Fordham.
- Responsibilities include creating a web application mockup in React, working with the Spotify Web API, and working with p5.js to create data visualization models for audio features found in music in correlation to mood.

FordhamHacks, Tech and Design Team

July 2019 – Present

- Responsible for front-end development using ReactJS and CSS components for Fordham University's 2020 hackathon website
- Designed splash page that handles pre-registry and sponsorship applications
- Optimized site responsiveness for cross-browsing

Fordham IT Team, Team member, New York, NY

August 2017

- Guided incoming freshmen to troubleshoot and set up devices to Fordham's new network by integrating security protocols and applications such as SafeConnect and Bitdefender

ADDITIONAL EXPERIENCE

Techne, Web developer

- In-progress side project website that has personalized job search and listing results for myself. Features a contemporary UI and simpler UX from other typical job search sites like indeed.com and glassdoor.com.

Melo, UI/UX designer and iOS developer

February – August 2019

- Side project iOS social media application for music. Using their Apple Music or Spotify subscription, users who share a song on the app can seamlessly share to followers who have either subscription. Feature ideas included filtering home feed by genre, discovering music by artist, genre, etc., and “Now Playing” around you.”
- Created UI/UX early prototypes using Figma and implemented onboarding process for new user sign-up with Swift.

hpdempsey.com, Web developer

December 2018 – Present

- Built personal resume website using Bootstrap CDN, along with Animate.css and AOS libraries. Deployed website with a namecheap.com domain and originally hosted on Heroku server, now being hosted on GitHub Pages

SKILLS AND LANGUAGES

- C++, Java, Swift, MySQL, HTML/CSS, React, Git, CLI, Xcode, Heroku, FileZilla, Figma, Adobe Photoshop CS3 & 6, Adobe Illustrator, Adobe Creative Suite
- Korean
